The icon is supposed to be in C:\WINDOWS\system32\SHELL32.dll

36 Start menu folder

--

Hope this helps. Let us know.

In [news:A11C50CD-D9B7-4193-AA69-9F2D9C7FDAD0@xxxxxxxxxxxxxx](mailto:news:A11C50CD-D9B7-4193-AA69-9F2D9C7FDAD0@xxxxxxxxxxxxxx),  
Chelmite <[Chelmite@xxxxxxxxxxxxxxxxxxxxxxxxxxxxx](mailto:Chelmite@xxxxxxxxxxxxxxxxxxxxxxxxxxxxx)> hunted and pecked:

1. CMD.EXE was not replaced by SFC.EXE.
2. The copy of CMD.EXE in dllcache looks the same.
3. I expanded cmd.ex\_ from the XP CD, and it looks the same.
4. I used cygwin's "sum" program to compute the checksum on all three of these files, and the checksums are identical.

Here's another odd thing...when I open a cascading menu, like Start->Programs, the icon at the right side of the Programs entry in the Start menu doesn't have the correct icon. Instead, it's a picture of a mouse. Do you have any idea where those icons come from? If it's a font, then perhaps that font is corrupted, or wherever that font is specified, perhaps the wrong font has been specified.

Thanks for your help!
