Contact Trend tech support—I have had a few customers with the same problem caused by a recent update from Trend.
TM tech support will walk you through the fix.

It is saying my antivirus is off. I have tried to restart my PC but every time

I do the same message comes up saying it is off and needs to be turned on.

What should I do to get it working again? The type of antivirus is the Trend

Micro PC-cillin internet security 12. A dont know if that is important or not

just thought it would help more with my problem.
