No I use no P2P. I recently subscribed to i-tunes because I refuse to use Kazza or Napster or any other P2P. i-tunes is not peer to peer.

If you patronize P2P networks you can pretty much count on being infected with a virus or malware, no matter how much anti-this and anti-that software you have installed.

Along with Norton Internet Security 2005, I run Ad-Aware, Bazoooka, Spybot-Search and Destroy, SpywareBlaster, and Windows malicious software removal tool at least every couple of days.

Ad-Aware occasionally finds 1 or 2 data miners in my temporary internet files, which I remove.

Bazoooka always gives a clean report (I'm wondering if it really does anything).

I keep Spyware Blaster updated and all protection turned on.

Spybot has detected "Windows security center firewall and antivirus disable

notify", which I told it to ignore, plus a couple of others that I removed when I ran it the first time. I have noticed in the Spybot ignore list

Re: Questions about my malware settings

that

CDilla, Hitbox, and Sidestep are set to ignore. CDilla worries me, I'm wondering if it's associated with itunes. Does anyone know about that,

and

is there any reason not to uncheck the ignore option on any of these?

Now here's what really got my attention. Yesterday when I ran Ad-Aware it found the following 4 files, and this is how they were described in the

log:

Adware.P2PNetworking object : File : C:\System Volume

Information_restore{D23EFF2A-BFEF-46A5-8364-D064E372DF2B}\RP126\A0014358.exe

Adware.P2PNetworking object : File : C:\System Volume

Information_restore{D23EFF2A-BFEF-46A5-8364-D064E372DF2B}\RP126\A0014399.DLL

Adware.P2PNetworking object : File : C:\System Volume

Information_restore{D23EFF2A-BFEF-46A5-8364-D064E372DF2B}\RP154\A0016637.DLL

Adware.P2PNetworking object : File : C:\System Volume

Information_restore{D23EFF2A-BFEF-46A5-8364-D064E372DF2B}\RP154\A0016639.exe

I quarantined them. Is this something that would have corrupted a restore point? What can anyone tell me about these?

I know this is a lot of Q&A, so I appreciate any expertise you

knowledgeable

Re: Questions about my malware settings

people can give me.

Thanks,
Rusty
