hi thecreator

i just bought a dell dimension 9150 with and integrated sound blaster audigy advanced HD Audi chip/card on a new dell 9150 pc

the windows opening and closing sounds don't play anymore

thanks

"thecreator" wrote:

Hi therandomone,

Do you have onboard Sound Chip or a PCI Sound Card? Don't have any specific ideas, until you post information on your Motherboard's Manufacturer and Model Number and your PCI Sound Card, if any.

Do you hear Windows opening and closing sounds?

i have the same problem as Herman where the sound doesn't play in in any areas outside of media players such as windows media, quicktime and real player

system restore doesn't work as everytime it seems to work at first but when the computer is restarted it just says that there wasn't anything to change

any ideas?

Re: help on sound

thanks

Hi Herman,

Have you tried Windows System Restore?

"Herman" <hermanwest@xxxxxxxx> wrote in message
news:1151195692.308054.267770@xx

symptoms

no errors in device manager. using recent
drivers (realtek ac97 3.88)

even ticks volume control shown on systray,
no control icon on tray

cannot record sound using windows own
recorder

cannot play sound from startin & shutting
down windows (play button
gone grey when choosing different windows
sound), icq, msn messenger
7.5, ie, flash. but sound can be heard using
windows media player,
quicktime, playing games (like americas
army, bf), windows live
messenger beta

any solution? thx for help
