Just keep tapping the F8 Function Key as the computer is booting up. A Menu will come up. Make sure that you run your Anti-Virus Scan in Safe Mode.

How can I get into Safe Mode when I cannot get past the "Log on to Windows" menu?  
The laptop continues to read "Logon Message" " Unable to log you on because your account has been locked out, please contact your administrator". I have left the machine for 15 minutes as suggested, however, same thing occurs. I know my user name and password, the laptop refuses to accept! I have no Administrator details. HELP!
