When I was try to change the time on my computer cause it was a bit fast,
I
get this message: "You do not have the proper privilege level to change
the
system time." I really have no idea what to do cause I'm log in as the
administrator and i don't have any other user accounts on my computer. Can
anyone help me please

If it's a permission issue, use (group policy editor) gpedit.msc to check
for proper permission.
Start, Run and enter gpedit.msc
Navigate to:
Computer Configuration
Windows Settings
Local Policies
User Rights Assignment
In right pane look for "Change system time" and double-click it
Check if Administrators group is included. If not add it. Otherwise you have
another issue.

Please note that gpedit is not available in Home edition
