LOL, yes i did see the warning.

But ... oh well .... i got everything backed up and know how to reformat the harddrive.

No problem

You're welcome. I kept my fingers crossed, I should have told you that the command can have nasty side effect at times! You probably saw the warning when you did it.

John

Worked great !

Thanks again !!!

Thanks John.

I will try that.

Boot to the Windows XP Recovery Console  
and issue the fixmbr command  
to remove the linux boot loader.

John

## Re: Followup: Removing Dual-Boot screen

Moose wrote:

I hope you can help me!  
I was Dualbooting windows  
xp professional and  
xandros(linux) on a  
seperate partition for a while  
because i wanted to try out  
linux..

Now i have decided to just  
use XP by itself again and  
merged the  
partitions did all the  
cleanups ,defrags and  
diskchecks.

I also made sure the boot.ini  
is back to normal by going  
into My  
computer-Properties -  
advanced - settings -  
edit.....

The BOOT.INI is back to  
the way it was before.  
Everytime i boot up the  
computer it still offers me to  
do a Dual-Boot  
and it uses a screen that was  
created by linux.

How do i get rid of the  
remainders of Linux (or  
Xandros)???

Thanks in advance !!!

Moose
