Are there any Error / Warning Reports in Event Viewer?

You can access Event Viewer by selecting Start, Administrative Tools, Event Viewer. When researching the meaning of the error, information regarding Event ID, Source and Description are important.

HOW TO: View and Manage Event Logs in Event Viewer in Windows XP  
<http://tinyurl.com/7u5r4>

A tip for posting copies of Error Reports! Run Event Viewer and double click on the error you want to copy. In the window, which appears is a button resembling two pages. Double click the button and close Event Viewer. Now start your message (email) and do a paste into the body of the message. This will paste the info from the Event Viewer Error Report complete with links into the message. Make sure this is the first paste after exiting from Event Viewer.

---

Hope this helps.

I don't think I have Event Viewer?

Re: cannot access add/remove programs section

When I click start, there's no Administrative Tools.
