Apparently you have some application that needs and installed C++ but didn't do it correctly.

This event occurs in conjunction with EventID 32 from source SideBySide and it is caused by an application that was not packaged with all of the necessary runtime files. In my case this was caused by the Logitech SetPoint software and was solved by getting the appropriate C++ 2005 Redistributable Package.

I have no idea what that application might be other than Logitech SetPoint software mentioned above. I am sure that there are plenty of others.

Download details: Visual C++ 2005 Redistributable Package (x86)

jetjock <[jetjock@hanger](mailto:jetjock@hanger)> hunted and pecked:

As far as I can tell, none of the below apply to the problems I described. I don't believe I am running any of mentioned programs.  
Thanks for the reply.
