New PC?

Contact HP

PS You didnt install any win update drivers did you?

If you did roll back the drivers, use drivers ONLY from HP site NOT winupdate

Hiya....

I have a HP Pavillion, 2.6GHZ with 960MB Ram with a ATI Radeon Express 200 graphics card installed. My problem is that soon after starting the computer (1 or 2 minutes after) my screen goes blank for a couple of seconds. I have all the latest updates etc but this annoying problem persists. It is a new computer and is also running Norton software.

Any ideas/suggestions would be greatly appreciated thanks

Dale
