I am trying to copy my documents onto a CD. I have a brand-new CD-RW in

the

drive. I get an error message: "Cannot create or replace XXXXXX: The

disk

is write-protected. Remove the write-protection or use another disk." I

have

tried it with another brand-new disk and got the same message. How do I remove write-protection?

It would be helpful if you mentioned what type of software you are using to burn your CD
