Have a HP All in one printer – HP PSC 950 – P.S.C.F. Has clock with date  
and  
time, of course. Does anyone know if the "fix" for the computer will also  
adjust that for the printer? Or, should one contact HP to see if they are  
going to issue an update ?  
Anyone have words of wisdom ? Thnks in advance.

I would not rely on a fix to XP to have any effect on your printer. (It  
might or it might not.) I would instead contact HP.  
But, how hard is to just change the time on the clock?  
Jim
