Hello Ian,

Thank you for using newsgroup!

From your post, I suggest you remove and reinstall Windows Administrative

Tools to test the issue.

Thanks & Regards,

Ken Zhao

| Hi,

| I have had the Windows Administrative Tools installed on my workstation
and

| all was fine, but now the icons in the control panel do not display for
these

| tools (such as dsa.msc) under administrative tools. The applications work
| fine, but the icons are blank (default program icon window on a white
| background). It's purely cosmetic, but a little annoying.

| I have refreshed my icon cache but this does not seem to effect the
control
| panel icons.

| (the non windows admin tools like "computer management" appear fine).

| Any assistance with this niggly problem would be appreciated.

| Thanks

.
