Mark,

Thanks for the links. Do I have anything to lose by resetting these permissions?

I also seem to think some form of update caused the problem. Based upon my backup logs, the problems started somewhere near the beginning of June.

Bruce

> You seem to be one of the many people posting here lately who have "Access Control List" (ACL) entries that have lost their info. If you are interested in experimenting with what is obviously your 'production machine', you might look over this recent article. (Personally, I suspect some recent 'windows security update', but what do I know? :)
