CD Burner XP Pro will make bootable CDs. Freeware, check on Google. Haven't needed to use it myself, but the option is there. HTH

Jim.

Get this little program...install it...right click the ISO and pick write image to CD.

boy is the knowledge base pea soup on this one!! I donno maybe its on purpose? I want to run memtest86 or microsofct ramtest. Both have an ISO ready to go but it needs to be into a bootable CD – how does one make a bootable cd to execute pre windows programs????
