Here is an odd one. My drive stopped reading audio CD's. BUT if I reinstall the driver, it will read the first audio CD no problem, but subsequent ones, no way. IT should be noted data CD's are read no problem, regardless.

I have a Compaq PResario 3360US laptop.
My CD ROM is a HL-DT-ST DVD-RW GWA-4040N . There is no recent driver (I've checked LG's website). But truthfully I don't think that would be the issue since it's worked fine for years until now.

So, any idea's?
