Hello,
When I try to restore an Image (that I made with Ghost) of the C-drive with the Symantec Recovery Disk of Ghost 9.0, I recieve a blue screen with this message:
A Problem has been detected and Windows has been shut down to prevent damage to your computer.
If this is the firs time you've seen this Stop error screen, restart your computer. If this screen appears again, follow these steps:
Check for viruses on your computer. Run CHKDSK /F etc..

Technical information:*** Stop: 0x0000007B (0xF78E2640, 0xC0000034, 0x00000000, 0x00000000)

Can somebody help me ? Thanks very much !

Are you restoring it to a new computer?
Restoring it to a new *type* of hard disk drive or with a different hard disk controller?

You need to perform a Repair installation (Google for repair installation of Windows XP).
