working hard at home wrote:

In the startup Item columb I have green check mark  
but no lable, No  
Command But does have Location of  
SOFTWARE\Microsoft\Windows|Current  
Version|Run. What is this file for is it real? Could  
it be the  
microsoft removal tool for spyware? What happens if I  
uncheck this  
from the startup.  
Many Thanks

Assuming you mean msconfig (there are other system  
"config" utilities), if it has no label, it's at least  
not part of the operating system. It –could– be a  
poorly written app, or malware; hard to say without  
more information. It should have a lable though.
