I have XP Pro, SR 2 and all updates; Office 2003; use Avast, Spybot, AdAware, and Windows Firewall is ON.

I had WMP but it kept getting larger and larger—don't need a retail shop on my computer, but only to save midi/wavs, etc for emails, designing, and playing my own CDs. Have Real Player now and its driving me nuts with "messages" et al.

Is there a way I can download an older version of WMP? Where do I find it... Doesn't seem to be on the MS web site.

Thanks everyone.
