| Hi,

|
| My home PC has been invaded with worms. It still functioned until I loaded
| spybot which detected all the problems but the PC is now shutting down. I
| have read the other threads on this, but my pc does not comply with the
| shutdown -A command. It launches a black dos window and a message appears in
| this for a few milliseconds, not long enough to see. After a minute I get the
| shutdown message.

|
| When i boot up I also get a KMODE_Exception_not_handled message
| UT_Kerner Error 1256

| Any ideas?

SpyBot S&D is not an anti virus application.

As noted; shutdown -a
will stop the shutdown process.

The following "IS" anti virus...

Download MULTI_AV.EXE from the URL --
http://www.pctipp.ch/ds/28400/28470/Multi_AV.exe

<http://www.pctipp.ch/downloads/dl/35905.asp>

English:

<http://www.raymond.cc/blog/archives/2008/01/09/scan-your-computer-with-multiple-anti-virus-for-free/>

To use this utility, perform the following...

Execute; Multi_AV.exe { Note: You must use the default folder C:\AV-CLS }

Choose; Unzip

Choose; Close

Execute; C:\AV-CLS\StartMenu.BAT

Re: NT Authority\System

{ or Double-click on 'Start Menu' in C:\AV-CLS }

NOTE: You may have to disable your software FireWall or allow WGET.EXE to go through your FireWall to allow it to download the needed AV vendor related files.

C:\AV-CLS\StartMenu.BAT --- { or Double-click on 'Start Menu' in C:\AV-CLS }

This will bring up the initial menu of choices and should be executed in Normal Mode.

This way all the components can be downloaded from each AV vendor's web site.

The choices are; Sophos, Trend, McAfee, Kaspersky, Exit this menu and Reboot the PC.

You can choose to go to each menu item and just download the needed files or you can download the files and perform a scan in Normal Mode. Once you have downloaded the files needed for each scanner you want to use, you should reboot the PC into Safe Mode [F8 key during boot] and re-run the menu again and choose which scanner you want to run in Safe Mode. It is suggested to run the scanners in both Safe Mode and Normal Mode.

When the menu is displayed hitting 'H' or 'h' will bring up a more comprehensive PDF help file.
