Hello,

I have the same problem with a Toshiba DP80F. When I want to print the test page I get the error message "invalid port no in line 47 DP80F.DEV". This line says "port=LPT1". But even if I change it to "port=USB001 (that is what my system offers when I install the printer" it does not work. Does anybody know what I should type here instead? (Windows XP, Notebook Samsung P55)

Thanks a lot,  
Chris
