I think you're stuck with waiting for news from the site. It really sounds like the cert is revoked to me.

After I installed the certificate as Trusted, I looked at it.

The dialog shows "Valid from 7/24/2007 to 7/24/2010"

BUT also says, "Windows does not have enough information to verify this certificate."

I've already contacted the government site about this and sent screenshots.

Any other suggestions?

"Mark L. Ferguson" wrote:

There is always the possibility that the cert is revoked. It would be easy to check that by unchecking the checkboxes for cert revocation at: IE, tools, options, advanced tab.
