Burning sw;
Ashampoo
B's recorder gold
I'm TOO DVD ripper
Instant CD+DVD
Intervideo WinDVD
Leadtek WinFastDVD
Windows Media Player
CD Recovery Toolbox Free
Express Burn

There are no Yellow Question marks in dev mgr

The results of running sigverif can be found at;
<http://www.byrneshfamily.com/sigverif.txt.htm>
I only included "Not signed"

Thanks for your help,

Bruce

Background information on Stop Error report
<http://msdn2.microsoft.com/en-us/library/ms796183.aspx>

0x000000C5: DRIVER_CORRUPTED_EXPOOL

An attempt occurred to touch invalid memory at a process IRQL that is too high. This is almost always caused by drivers that have corrupted the system pool. If you've recently installed any new software, check to see if it's properly installed; and check for updated drivers on the

Re: bsod burning dvd

manufacturer's web site.

Source: <http://aumha.org/a/stop.htm>

Are there any yellow question marks in Device Manager? Right click on the My Computer icon on your Desktop and select Properties, Hardware, Device Manager. If yes what is the Device Error code?

Try Start, Run, type "sigverif.exe" without quotes and hit OK. What drivers are listed as unsigned? Disregard those which are not checked.

Please post the result.

What burning software including version are you using?

error 0XC0000005 0X806F894F 0XAD588848 0X00000000 trying to write burn dvd. Fails on internal and external usb dvds . Replaced internal dvd with different type and still fails.

Updated all dvd drivers to latest versions – still fails.

Same error using multiple burning software suites.

I don't do much burning, so it's impossible to tell what MS updates or sw installed prior to encountering problem.

Any help would be greatly appreciated,

Thanks,

Bruce
