You have only one physical drive split up into two partitions. Your primary partition (C:), which contains the operating system, is way too small. Follow Ron's advice (use BootIt Next Generation or a similar program) and you won't need to be worry about being low on disk space!

"carolyn" <[carolyn@xxxxxxxxxxxxxxxxxxxxxxxx](mailto:carolyn@xxxxxxxxxxxxxxxxxxxxxxxx)> wrote in message <news:CC05274C-F1BA-471A-BAFA-71D6B1CFD99F@xxxxxxxxxxxxxxxx>

It says C is the primary partition and D is the extended partition--

I'm not sure about the partition part - All I know is I have C drive 13GB and D drive 130GB- how would find out if it is just a partition of a single drive?

Right-click My Computer and select Manage. Under Storage, Click Disk Management. What do you see?
