<snip for brevity>

Thanks for the info.

You're welcome...

I downloaded and installed Online Armor free personal firewall after checking site reviews of firewalls. Comodo free came out pretty good/better, but it won't even install on my box.

....it would be beneficial reading the articles. But if you have may I ask your reasons for deciding on PFW? (It can't be outbound control, can it?).

I have used a router for about 4 years now to connect 2 machines to the 'net I already had seconfigXP, but didn't have it in use, doh! I have now.

Did you implement countermeasures against DNSChanger as well?

.
