- 1.) Received unidentified email stating my system may be slow due to some kind of leakage, memory? Spam? Anybody.
- 2.) Need to understand what a browser is, what it does and how do I access it. Some spam says can opt out by putting the address in the browser?
- 3.) I uninstalled MusicBox. How do I get it back? What is it for. I was trying to remove programs to make my system faster since I have slower service to to cost reasons.

Thanks for anyhelp!
