Hi Guys,

Thanks for replies

> Check the popups' title bar carefully...

I meant greetings from people who are in the messenger(s) lists which was set in MSN Messenger AND partially left in Windows one before switching to MSN

Secondly I found Jonathan's post in on of the threads here and followed the procedures concerning disabling Win Mess :- ) and Norton antivirus check. The only thing I did in addition to the latter I set scan for viruses File Transfer option

Thanks again

PS too early 2 report any results..hope it works otherwise I'll bother you again

---
