if you don't want a password and also disable guest account, you may try to create the same username on all computers and logon automatically. quoted form <http://www.chicagotech.net>

How To Enable Automatic Logon in Windows 2000/XP Pro With a Non-domain System

A: In Control Panel, double-click Users and Passwords. Click to clear the Users must enter a user name and password to use this computer check box. Click the Advanced tab. Click to clear the Require users to press Ctrl-Alt-Del before logging on check box.
