1st has sp2 pc IP Address: 169.254.115.208  
Subnet Mask: 255.255.0.0

2nd sp1  
IP 169.254.54.35  
Subnet Mask: 255.255.0.0

If I dont set the ips and sub mask it has a yellow!  
through the local area connection icon saying local  
limited or no connection. If i set them it gos to a  
normal icon then I can not see the workgroup pc names  
workgrop are set up shared folders are set up allso the  
pc with sp1 can see its self in my network places but the  
sp2 one just says workgroup inaccesable you do not have  
permission etc I have checked everything and its set up  
the right way I thing well it worked fine before I put  
sp2 on anyway.

yes I can ping each computer.

DNS Server:

WINS Server:
