q/ you administer an active directory based network. the human resources dept maintains an internal web site that contains information regarding employee benefits, forms and company policies. you attempt to access the web site by using its dns name but you receive the following error

cannot find server or dns web site

you need to be bale to access the human resources web site which of the following actions should you perform

a on the iis computer, enable anonymous access to the website

b on your computer correctly specify the ip address of the dns server

c grant your user account the read iis permission for the human resources web site

d configure web sharing for the root folder of the human resources web site

anyone able to point me in the right direction and preferably why?
