hello!!!!

tried creating this batch file ....

```
@echo off
net use /persistent:no
net use x:\\server\shared
net use x:\\server\home folder
```

was place on the following... \document and settings\all users\start menu\programs\startup\netlogon.bat (m using an xp machine). i have mapped the drive at first to make sure it is connecting then created the netlogon batch file. i got "system error 67 network path not found". this error was after i restarted the machine to test. any idea on how i can make this work. i made sure the correct drive are mapped... then this error .... please advise!!!!
