this may help. quoted from <http://www.chicagotech.net/systemerrors.htm>
System error 1385 has occurred – Logon failure: the user has not been granted the requested logon type at this computer

Symptoms: When using net use \\remotecomputer\ahredname, you may receive above message.

Resolution: The users do not have permission to connect to the remote computer. To resolve this problem: on the remote computer, select Administrative Tools>Local Security Settings>Local Policies>User Rights Assignment, right-click on Access this computer from the network>Properties>Add Users or Groups, add everyone or any users you want to be able to access the computer from the network.

Don't send e-mail or reply to me except you need consulting services. Posting on MS newsgroup will benefit all readers and you may get more help.
