Andrew,

The mysterious LSP / Winsock corruption can cause an assortment of ills, and your symptoms are consistent with that. Partial connectivity problems, Internet connectivity problems while local connectivity is unaffected, slow connectivity are all possible symptoms. WinsockXPFix is only one of 4 possible corrective procedures too.

<http://nitecruZR.blogspot.com/2005/05/problems-with-lsp-winsoc-layer-in.html>>

Another possibility that comes to mind is the MTU issue.

<http://nitecruZR.blogspot.com/2005/06/internet-connectivity-problems-caused.html>>

Oh yeah, did you post your HJT log to any expert forum? Can you provide a link if so?

Re: Internet Connection Lost After Installation of Windows XP Service Pack 2 (WinXP SP2)

And is it possible that the laptop has an IP address of 192.168.1.100, not 192.168.100.1? Addresses 192.168.1.1 and 192.168.100.1 aren't on the same class C subnet. Maybe if you post "ipconfig /all" from both computers, we could get a picture of your problem.
