Anders,

Did you set full permissions in both Sharing – Permissions, and in Security?

Network access requires local permissions, so effective rights is the combination of both Sharing (for network rights), and Security (for local rights).

<<http://nitecruZR.blogspot.com/2005/06/file-sharing-under-windows-xp.html#Help>>

And Anders, posting your email address openly will get you more unwanted email, than wanted email. Learn to munge your email address properly, to keep yourself a bit safer when posting to open forums. Protect yourself and the rest of the internet – read this article.

<<http://nitecruZR.blogspot.com/2005/05/how-to-post-on-usenet-and-encourage.html#Munging>>
