Ok Chuck, I ensured all those were on and here's the logs.

Start CPSServ V1.10 – ZACKHIX2

Find Computer Browser ("browser")

Checking \\ZACKHIX2...

Found browser on:

\\ZACKHIX2

Find DHCP Client ("dhcp")

Checking \\ZACKHIX2...

Found dhcp on:

\\ZACKHIX2

Find TCP/IP NetBIOS Helper ("lmhosts")

Checking \\ZACKHIX2...

Found lmhosts on:

\\ZACKHIX2

Find Remote Registry ("remoteregistry")

Checking \\ZACKHIX2... No active service named remoteregistry found.

Find Server ("server")

Checking \\ZACKHIX2...

Found server on:

\\ZACKHIX2

Find WF / ICS ("sharedaccess")

Checking \\ZACKHIX2...

Found sharedaccess on:

\\ZACKHIX2

Find Workstation ("workstation")

Checking \\ZACKHIX2...

Found workstation on:

\\ZACKHIX2

End CPSServ V1.10 – ZACKHIX2

Mhm.

Start CPSServ V1.10 – ZACKEXCLAMATION

Find Computer Browser ("browser")

No active service named browser found.

Find DHCP Client ("dhcp")

No active service named dhcp found.

Find TCP/IP NetBIOS Helper ("lmhosts")

No active service named lmhosts found.

Find Remote Registry ("remoteregistry")

No active service named remoteregistry found.

Find Server ("server")

No active service named server found.

Find WF / ICS ("sharedaccess")

No active service named sharedaccess found.

Find Workstation ("workstation")

Re: One Computer Connected, Other Not

No active service named workstation found.

End CPSServ V1.10 – ZACKEXCLAMATION

So obviously, Zackexclamation isn't getting anything at all. That's what I gather, at least.
