Sorry, could anyone tell my how the process to get the password of the administrator

when you are the USER permission have to access to the Network

So my question could we get the password of the Admin which we access as a User?

and if so, please tell how?

You posted this in another newsgroup. I'll be honest with you – because of the way you worded this post I'm uncomfortable with giving you the answer. Other people may be uncomfortable also and that's why you're not getting answers.

If this is a work situation, ask your systems administrator. Otherwise, use the power of Google to find out the answer.

Sorry, but i'm sure that you don't know the procedure so you just wanted to show me that is.....  
but this groups are made to discuss not to show that you the answer and i don't want to tell how??

Re: HOW CAN i GET THE ADMINISTRATOR PASSWORD?

even i send it to some groups else, bec of i want to know how!  
i think it's not the problem, if u can send such a qustion  
to some groups!!! so thanks for ur help!!!
