| Recently installed SP2, not sure if this problem started before of after,
| but IE just shuts down after a minute or two of surfing. I used to get this
| message:

| < iexplore.exe

| The instruction at "0x024397a0" referenced memory at "0x024397a0". The
| memory could not be "read". >

| I havent seen that message for a couple days, but I do see another one:

| < runtime error

| prog: c:\progra~1\common~1\tsa\tts.exe >

| I dont always see this runtime error, usually IE just closes and thats that.
| I thought I could uninstall/reinstall IE, but I cant find it in Add/Remove
| programs.

| However, I DID find 4 versions of JAVA 2 Runtime Environ SE:

| *v1.3.1, * v1.3.1_02,* v1.4.1_02 and * _05 .

| Do I need all of this JAVA stuff?

| IE has become just about useless, any help would be appreciated. Non-geek,
