hmmmmmm.....

thanks guys, looks like I'll hold off on upgrading my BIOS. dont really have any problems, so Im gonna keep well enuff alone!
anyone out there done a BIOS flash?.... was it a good or bad thing?

like I said before, I just dont want that sick feeling in my stomach when I turn my comp on and I get either all black, or the infamous blue screen of death.....so for now, my Dell XPS will stay w it's present BIOS... :)

thx for the tips guys

ps..... those who said to upgrade, have ya done a BIOS upgrade before?
good? bad? mixed results?
