I was unable to locate anything about 2003 Server, but this article for Windows 2000 may help....

Typically there is a problem with a device driver or with a missing or corrupt system file used during Windows startup...from <http://aumha.org/win5/kbestop.php>

Here's a link to the MSDN article:

<http://msdn.microsoft.com/library/default.asp?url=/library/en-us/w2kmsgs/1216.asp>
