Sounds like one of the very obnoxious spy wares that in my opinion is every bit as noxious as any virus out there. I was having the same affliction, and while trying to get rid of it, it just kept "taking over more" until i didnt even have the choic of search engines, if I even made it to a site I was aiming for. Try running a spyware remover, and I hope that helps~!!

>Does anybody know how to get rid of www.your-seach.info/start.html from desktop? Also, took over my explorer.

>I tried deleting and cleaning trash to get rid of 3 icons this site put on my desktop. Also, reset my explorer back, to show Yahoo. But when I restart my computer, the desktop stuff comes back. And my explorer goes back to that stupid site.

>

>I Also tried to Restore my computer to an earlier time, but I get an error, saying to pick a different date. I tried this about 7 times, but got the same error.

>

>I think my Windows Media Player is on the fritz, also. Caused by the same site?

>

>Sorry, I'm not very tech savvy. So be gentle on me.

>

>I appreciate anybodies help. Thanks in advance.
