after fitting new harddrive,downloaded updates
(,security, driver, etc)also SP 1.

I get this message 'unsuccessful download of SP 1,'

"The core system file(kernal)used to start this
computer is not a MS Win. file"

see Q327101

My copy of XP is legal, no problem
registering, and i had no trouble putting SP 1 into the
system as loaded onto my last HD.

Any help with a solution will be much appreciated
