>*So you must be thinking that the above two things got your back now – you are covered, safe and secure in your little fox hole.*
Wrong! There are
>*more bad guys out there. There are annoyances out there you can get without trying. Your normal web surfing, maybe a wrong click on a web page, maybe just a momentary lack of judgment by installing some software packages without doing the research.. And all of a sudden your screen starts filling up with advertisements or your Internet seems much slower or your home page won't stay what you set it and goes someplace unfamiliar to you. This is spyware. There are a whole SLEW of software packages out there to get rid of this crud and help prevent reinfection. Some of the products already mentioned might even have branched out into this arena.*
However, there are
>*a few applications that seem to be the best at what they do, which is eradicating and immunizing your system from this crap.*
Strangely, the best
>*products I have found in this category ARE generally free. That is a trend I like. I make donations to some of them, they deserve it!*

Check disc is run frequently also, I run sfc on regular basis. I run spyware (updated), and antivirus (updated) every time I terminate an internet connection. My hardware drivers are all up to*

microsoft.public.windowsxp.perform_maintain: Re: Bet You Can't Fix This

date, I'm constantly performing maintenance on my p.c.
Could the fact that my hard drive is nearly full be
causing this problem? Thank you for your reply.

P.S. Sorry for the tyop eroder! Oh dear!
