In news:9CE3AFBD-B3A7-4DE8-9760-FF53F30DBE94@xxxxxxxxxxxxxxxxx,
kathie16 <kathie16@xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx> had this to say:

My reply is at the bottom of your sent message:

> My D drive has disappeared from "My Computer". I have tried to
> uninstall and re-install it from device manager, but get an error
> message to the effect that Windows is unable to start the hardware
> device because configuration information (in the registry) is damaged
> or incomplete. Code 19. I tried installing an external drive – but
> get the same result. I have also edited the registry per MS article
> ID314060 (Q314060) and nothing changed. Is there a new pc in my
> future??

That depends... What is your D: drive normally? Is it a hard disk or an
optical disk?
