John, read this...

How to Automate the Disk Cleanup Tool in Windows XP

<http://support.microsoft.com/kb/315246>

If all you do is schedule cleanmgr.exe, Disk Cleanup will open just waiting for user input. If you set it up to run with cleanmgr /sagerun:##, it will actually run and clean whatever presets that you have setup with cleanmgr /sageset:##.

Here are another couple of articles that may be of some help...

Automate Disk Cleanup using Task Scheduler in Windows XP

<http://windowsxp.mvps.org/Automate.htm>

Clear the Temporary Internet Files using the Windows XP Disk Cleanup utility

<http://windowsxp.mvps.org/clearxptif.htm>

Read through all three articles.

Hi:

Re: Task Scheduler not working automatically

No, I've never used the command you mentioned. All I've ever done was follow the automated wizard to schedule tasks. Where do I put the command you mentioned?

Sincerely,

—

john

Hello:

I recently installed NIS 2007 as a free upgrade. Prior to installing, my task scheduler worked fine. For example, with disk clean up, at 10:00 pm every evening disk clean up would start up & delete files with no intervention from me. Now, at 10:00, disk clean up shows up in my task bar. I have to click on it. It appears & brings up a list of items & prompts me to click OK to delete. I never had to do this before. I have reset the schedule time, went

Re: Task Scheduler not working automatically

into services to see if
task scheduler was set to automatic & tested
task scheduler by choosing
the calculator.

I even contacted Dell & a tech remotely
checked my settings & couldn't
find anything wrong.

Please help.

Sincerely,

John
