Go to Control Panel > Network and Internet Connections.

Right click your connection,(the one used to connect to the internet),and select properties. On the advanced tab uncheck "Allow other network users to connect through this computer's Internet connection" and click ok.

| I need help, I live in a very rural area and the only internet available to
| me at the present time is dial up. I have 2 pc's sharing the internet and
| haven't had any problems until lately. Now my event viewer is full of the
| following error

| Event Type: Error

| Event Source: ipnathlp

| Event Category: None

| Event ID: 31012

| Date: 5/31/2007

| Time: 8:16:28 AM

| User: N/A

| Computer: Description:

| The DNS proxy agent encountered an error while obtaining the local list of
| name-resolution servers. Some DNS or WINS servers may be inaccessible to
| clients on the local network. The data is the error code.

| For more information, see Help and Support Center at

| <http://go.microsoft.com/fwlink/events.asp>.

| Data:

| 0000: e8 00 00 00 è...

| and also now I am getting disconnected constantly. Could someone tell me
| what this error means?
