Hi Gerry,

Sorry about the links, I had read in another post that we should put the dumps on a file hoster and link to them, so I thought that was the protocol. My apologies if it is not.

This was the first:

Error code 10000050, parameter1 ffffffff, parameter2 00000000, parameter3 ffffffff, parameter4 00000000.

This was the second:

Error code 000000c2, parameter1 00000007, parameter2 00000cd4, parameter3 02060001, parameter4 86c63ec0.

Thank you!

Hi Devil,

As for Zonealarm, I will look into replacing it, but cannot go without any firewall, so it will have to do for now, it has never been the problem before, and it wasn't updated, so I wonder what has changed about it. Any suggestion for an alternate firewall that has both in and out bound protection?

Thank you!

Re: BSOD minidumps... HELP!

If you want help post copies of the Stop Error Error messages not links to web sites.

Hope this helps.

Hi,

I keep getting BSOD's, they just started a couple of days ago.

I have:

1. run antivirus – clean
2. run antispyware – clean
3. system restore to a point in Dec when I was rock solid stable.

I have run two minidumps though the debugger, they are located at:

<http://www.4shared.com/file/34381781/9ff35394/debuglog01-09-2008a.html>

<http://www.4shared.com/file/34381779/16b0c769/debuglog01-09-2008b.html>

I Have read The Dumps ANd i Think "Zonealarm" Is The Coulpit

Zonealarm is Also know For Bugcheck C2

Re: BSOD minidumps... HELP!

Uninstall ZoneAlarm
