Hi Duane,

I didn't receive your E-mail, did you put the right address like to\_you\_ross (note the Underscore in( to\_you\_ross) they are not

to-you-rossSPAMLAM@xxxxxxxxxxxxx

Copy this to your Notepad and remove the REMOVETHIS:

to\_you\_rossREMOVETHIS@xxxxxxxxxxxxx

I will let you know my answer to your queries after having a look on your log, you may end up not doing a clean install or it could be your best option to wipe out the HDD clean!.

Can you please include any error messages you get and have a look in the Event Viewer for more, copy and paste in your next msg.

Hey Nass, thanks for all your help. I've ran everything I know and the computer still hangs on Boot-up. There were some "Hardware Innterrupts" using Procexp.exe that I noticed. So I've put about 40+ hours into this thing and I think it is time to reinstall the system software! I do have her files backed-up.

Would you reccomend a good overall software / virus / spyware protection system that I should buy.

I normally run AVG, Spybot (with Tea Timer --- but the kids always says ALLOW when it asks you if you want to change something!!

They are always on MySpace, YouTube etc..... and leave us parents with the "fun" of fixing their computer!

RE: Windows takes over five minutes to get to the login screen

I noticed that you recommended: na\_issdm\_ca\_32\_en\_Store\_trial.exe

Is that a good "overall protection / turn-key" system? If so, I will go through your links on your web site so hopefully you can get some sort of credit!!

Please reply to the e-mail I sent to Yahoo and I will send you the log files that you requested.

Regards,

Duane

PS I've put the XP disk in and told BIOS to restart from CD....but it is still hanging!! Any ideas. I'd like you to look at the log files before I reinstall everything.

Guess I did not figure out the correct e-mail "code!"

I sent it to REMOVETHIS@xxxxxxxxxxxxxxxx and it bounced back. Please reply to my hotmail account when you receive my e-mail (I want to make sure I am sending the log files to the correct e-mail). Thanks.  
Duane

REMOVETHIS it mean remove the capital letters to e-mail me and leave the to\_you\_ross at yahoo.  
HTH
