Thanks Ken, I'll make sure they don't run at the same time. I'm amazed at how much better my system runs with-out AVG8 !

You're welcome. Glad to help.

I tried Google for any help on the following topic, but got no definite results so I thought I would try here. I used to have Ad-Aware, SUPERAntiSpyware and AVG 8 on my system, but I got rid of AVG 8 because it took forever to run, (21/2 hrs), and installed Avast 4.8 Home Edition. Can anyone please inform me if these three, Ad-Aware – SUPERAntiSpyware – Avast, are compatible with each other or will conflicts arise between them?

Re: Compatibility

Yes they are. I run them all here, with no problems at all. The only thing I would avoid doing is running scans with more than one of them at once.
