I have Tried to make Photo Stories, But I can not add Music  
Why? I am using "XP" SP2 Home Version with Latest Download

=====  
OK...you are on the screen that  
says, "Add Background Music".

What happens when you click the  
"Select Music" button?

Do you have music files in the correct format? Windows Media Audio (WMA),  
MP3, or WAV format?

Or...click the "Create Music" button...  
Make your choices...click...OK / Preview...

Do you receive errors? What are they?

Also, you may find some useful info at the following site:

Movie Maker 2 - [www.papajohn.org](http://www.papajohn.org)  
Wait for the left pane to fully load and  
select...Photo Story 3 / Background Music.
