You could also go to My Computer -- Rightclick on your camera icon after you connected it and chose "get picture using camera and scanner wizard" !
Not quite automated but better than nothing . :-)

Is it possible to get the Scanner & Camera Wizard to startup when I plug the SD card from the camera in to the computer? At the moment nothing happens when I plug the card in. I have to go to My Computer and find the drive, then copy the photos manually. I would like to use the wizard as it sets up a folder and renames the photos.
